YFonGlobal Selects World Communication Group Services as their Network Operations Supplier

**Internet Media Company utilizes Carrier Class Switching and Facilities Management for
Hosted VoIP Capabilities**

February 6, 2007

Washington, DC (August xx, 2006)—Internet media company and VoIP provider, YFonGlobal, announced today that it has launched its mYFonBrand platform using World Communication Group Services as their Network Operations Supplier. “World Communication Group Services (WCGS) represents significant capabilities, know-how, and facilities, so that we can support our customer needs with quality, said Marian Sabety, President and CEO of YFonGlobal.

“My experience in telecommunications applications and systems integration has reinforced the value of a solid partner, in terms of competence, quality, and commitment to joint success. Arnie Goodstein, and his team, represent the type of experienced network design and implementation expertise that will provide our customers with rock-solid programs”, Sabety continued. WCGS provides YFonGlobal switching, and facilities management for IP-based applications, including a hybrid pre-paid calling card/VoIP program (www.mYFon.com), and a secure collaborative network applications for both consumer and business programs. YFonGlobal provides resellers and service providers with branded turn-key IP services for data, media, and voice applications—all two-tier branded so that channels and their sale agents can offer value-add programs under their private label.

“WCGS is pleased to be providing class 5 VoIP services to YFonGlobal”, said Arnie Goodstein, CEO of WCGS. YFonGlobal is exactly the type of forward-thinking IP services provider for our platform. They are the perfect customer fit for us”, continued Goodstein.

Our offering provides YFonGlobal with all of the advantages of owning their own network while removing the day-to-day burdens that would normally be associated with such ownership. YFonGlobal can now focus their energies on selling and marketing their products knowing that they have a dedicated professional team focused on taking care of all of their back-end operations. Both YFonGlobal and WCGS believe that this is the best formula for success in a business where technology is rapidly changing.

About YFonGlobal
